

Summary

Computer Engineering student with hands-on experience building AI-powered applications, analyzing large-scale data, and deploying ML models, with a strong foundation in Python, system design, and problem-solving.

Education

B.Tech., Computer Engineering	Usha Mittal Institute of Technology, Mumbai	9.362 2023 - 2027
Senior Secondary (HSC)	R P Jr College Of Arts, Science & Commerce	74.33% 2023
Secondary (CBSE)	Rahul International School	92.40% 2021

Experience & Leadership

Data Science Intern	Prodigy InfoTech	[Certificate]	Jul – Aug 2025
• Conducted data cleaning, EDA, and feature engineering across multiple datasets, extracting actionable insights through statistical analysis and visualization.			
• Built interactive reports and visualizations using Python to communicate trends, correlations, and model insights.			
Content Strategist	Google Developer Group (GDG), UMIT		2025 – 2026
• Collaborated with cross-functional technical teams to design and communicate developer-focused content and initiatives to 200+ community members.			
Social Media & Graphics Head	SNTD ACM-W		2024 – 2025
• Grew chapter social media engagement by 40% & introduced 100+ students to technology through the Hour of Code’24 initiative.			

Projects

Intervista – Intelligent Adaptive Learning & Performance Modeling System	Feb 2026 – Ongoing	[🔗]
Python, FastAPI, NLP, RAG, LLM APIs		
• Built an AI-powered interview platform with resume analysis, mock interviews, personalized feedback, and adaptive learning recommendations using FastAPI and LLM APIs.		
• Implemented RAG-based knowledge retrieval and LLM evaluation to generate context-aware interview feedback and learning recommendations.		
Retail Sales & Product Performance Dashboard	Jan 2026	[Tableau]
Tableau, Excel		
• Built an interactive Tableau dashboard for sales analysis across 5+ product dimensions and 10+ key performance indicators.		
• Identified top-performing categories and outlet trends to support data-driven inventory and marketing decisions.		
Leaf Disease Detection – Deep Learning Image Classifier	Oct 2025	[🔗]
Python, TensorFlow, MobileNetV2, Streamlit		
• Fine-tuned a MobileNetV2 CNN via transfer learning on 14+ disease classes, achieving over 80% classification accuracy.		
• Developed and deployed a Streamlit application for real-time plant disease diagnosis using leaf images.		
US Accidents Data Analysis – Large-Scale EDA	Jul 2025	[🔗]
Python, Pandas, Matplotlib, NumPy		
• Performed exploratory data analysis on a 2 GB accident dataset to identify geographic and temporal accident patterns.		
• Identified 5+ high-risk regions and peak accident intervals; generated insights supporting data-driven traffic risk mitigation.		

Skills

Languages: Python, SQL, C++ (DSA & competitive programming)
AI / ML: Machine Learning, Deep Learning, NLP, Large Language Models (LLMs), RAG, TensorFlow, scikit-learn
Data & Tools: Pandas, NumPy, Tableau, FastAPI, Streamlit, Git, GitHub
Coursework: Engineering Mathematics, Statistics, Probability

Achievements & Certifications

- HackFusion 2026** (IEEE UMIT & IEEE SPIT): Developed a travel-planning application with real-time itinerary generation during a 24-hour hackathon. [\[Certificate\]](#)
- Deloitte Data Analytics Job Simulation:** Completed practical tasks involving exploratory data analysis, forensic data analysis, and business reporting. [\[Certificate\]](#)
- Research Work:** Authored research paper on Big Data Analytics in startup decision-making — manuscript completed [\[Paper\]](#)
- Best Project Award – ACM Summer School 2025:** Timelens VR, an AR/VR storytelling experience, was recognized for innovation in XR technology and user engagement. [\[Certificate\]](#)
